MICROPROCESSORS AND MICROSYSTEMS

Index to Volume 21 (1997–1998)

No 1 pp 1–70
No 2 pp 73–141
No 3 pp 147–209
No 4 pp 213–270
No 5 pp 271–342
No 6 pp 347–413
No 7–8 pp 417–517
No 9 pp 523–580
No 10 pp 585–632

Article index

Number 1

The death of smart sensors and effectors for future combat aircraft
R.A. Edwards, B. Gleaves 1
ARINC 629 data bus physical layer technology
N. Rieckmann 13
Applying commercial real-time data networks to future military avionics
C.E. Hudgins, J.E. Schroeder 21
Dynamic software reconfiguration for fault-tolerant real-time avionic systems
S.M. Ellis 29
Harmonisation of defence standards for safety-critical software
W. Marsh 41
Component libraries for software re-use
U. Kernebeck 49
Timing analysis of the ARINC 629 databus for real-time applications
N.C. Audsley, A. Grigg 55
Modular avionics operating system – software concept
A.S. Wake, P.R. Miller, P. Moxon, M.A. Fletcher 61

Number 2

VLSI implementation of detection of R2 signalization
G. Davidovic, J. Ciric, V. Milutinovic, G. Hadzic, L. Radicevic 73
Design and implementation of a low-cost wireless network for remote control and monitoring applications
A.K. Salkintzis, J.E. Plevridis, C.S. Koukourlis, C. Chamzas 79
A quantitative analysis of the benefits of the use of area-I/O pads in FPGAs
J. Depreitere, H. Van Marck, J. Van Campenhout 89
System based on digital signal processors (DSPs) for communication between industrial processes with critical time
M. Mazo, P. Martin, L. Boquete, I. Fernández, F. Espinosa, M.A. López 99
Microprocessor implementation of field-oriented control of induction motors using ANN observers
W.W.L. Keerthipala, M.H. Chun, B.R. Duggal 105
A transputer-based parallel controller for motor control applications
M.-F. Tsai, Y.-Y. Tzou 113
Reducing memory penalty by a programmable prefetch engine for on-chip caches
T.-F. Chen 121
Structured parallel design for embedded vision systems: a case study
A. Çuhadar, A.C. Downton, M. Fleury 131

Number 3

Achieving fault tolerance and high reliability
A.K. Somani 147
Algorithm-based fault tolerance: a review
M. Vijay, R. Mittal 151
A new scheduling approach supporting different fault-tolerant techniques for real-time multiprocessor systems
G. Manimaran, C. Siva Ram Murthy 163
Single-source fault-tolerant broadcasting for two-dimensional meshes without virtual channels
D.R. Avresky, C.M. Cunningham 175
Single fault-tolerant distributed shared memory using competitive update
J.-H. Kim, N.H. Vaidya 183
On-line error detection through data duplication in distributed-memory systems
C. Gong, R. Melhem, R. Gupta 197

Number 4

A telephone adapter for Internet telephony systems
S. Foo, C.K. Yeo, S.C. Hui 213
Accelerating finite-difference analysis simulations with a configurable computing machine
K.J. Paar, P.M. Athanas 223
Performance evaluation of DSP and transputer based systems in sequential real-time applications
M.O. Tokhi, M.A. Hossian, C. Chambers 237
PROTOS—A microcontroller/FPGA-based prototyping system for embedded applications
Z. Salcic 249
High-performance FPGA-based implementation of Kalman filter
C.R. Lee, Z. Salcic 257
Book review
B. Christianson

Number 5

Programmable digital neuron using pulsewidth-coded data
K.T. Lau, S.H. Kang, M.C. Tan, Y.K. Choo 271
Low-power memory hierarchies: an argument for second-level caches
J.K. Flanagan, J.K. Archibald, J. Su 279
Ring-connected trees: a multipurpose VLSI architecture for parallel processing
S.K. Basu, J. Dattagupta, R. Dattagupta 291
Dynamic task scheduling in distributed real time systems using fuzzy rules
M. Litoiu, T.C. Ionescu, J. Labarta 299
On timing constraints of snooping in a bus-based COMA multiprocessor
S. Cho, J. Kong, G. Lee 313

A study of bus emulation. Application to M68000 based systems
J.M. Rodriguez, A. Civit-Balcells, G. Jiménez, J.L. Sevillano, F. Díaz 319
Design of a VMEbus-based programmable logic controller (PLC)
T.F. Al-Khudairy, B.A.R. Al-Hashemy, M.A.J. Al-Baker 329
Interfacing between LVDS and ECL
A. Diermeier 337

Number 6

Special Issue: Hardware/Software Design for Mobile Robots
C. Czarnecki 347
A modular computing architecture for autonomous robots
H. Hu, D. Gu, M. Brady 349
Hardware development of the Yorick series of active vision systems
P.M. Sharkey, D.W. Murray, P.F. McLauchlan, J.P. Brooker 363
The use of low cost FM-CW radar sensors in navigation
R.M. Parkin, B. Tao, M.R. Jackson 377
An integrated system for the sensor processing and control of robot systems
P. Webb 383
Evolving communicating controllers for multiple mobile robot systems
I. Ashiru, C.A. Czarnecki 393
Microcontroller based genetic algorithms
I.J. Griffiths, Q.H. Mehdi, N.E. Gough 403

Number 7–8

Editorial
P. Walker 417
IEEE 1355 data–strobe links: ATM speed at RS232 cost
B.M. Cook 421
Electrical and optical transmission of IEEE 1355 DS-links
S. Haas, R.W. Dobinson, B. Martin 431
Deadlock-free interval labelling
M.A. Firth, A. Jones 441
Avoiding head-of-line blocking in wormhole routed networks by central buffering
T. Waadeland, T. Skeie 455
Message replication on IEEE 1355 serial links
P. Furness, C.R. Brown, S. Harrison 463
One-fault tolerance and beyond in wormhole routed meshes
O. Lysne, T. Skeie, T. Waadeland 471
ATLAS I: a single-chip, gigabit ATM switch with HIC/HS links and multi-lane back-pressure
M. Katevenis, D.N. Serpanos, G. Dimitriadis 481
Towards a generic analytical model of wormhole routing networks
O. Lysne 491
Performance/cost analyses for common network topologies
M.A. Firth, A. Jones, C. Wright 499
The Macramé 1024 node switching network
S. Haas, D.A. Thornley, M. Zhu, R.W. Dobinson, B. Martin 511

Number 9

Register-file allocation via graph coloring
F. Ali, I. Ahmad 523
Design of an OS9 operating system extension for a message-passing multiprocessor
E.F.V. Martins, A.N. da Cruz 533
The effect of the router arbitration policy on the scalability of ServerNet™ Topologies
D.R. Avresky, V. Shurbanov, R. Horst 545
PC–ISDN interface
F. Kovaevi 563
A vision-guided fuzzy logic control system for dynamic pursuit of a moving target
K.-M. Lee, Y. Qian 571

Number 10

Achieving quality, safety, security and reliability in software systems
D.A. Gritzalis 585
Developing and checking prescriptive specifications for safety improvement
S. Yih, J. Tian 587
Specification composition for the verification of message passing program composition
J.Y. Cotronis, Z. Tsiatsoulis 595
Motivated humans for reliable software products
S.A. Frangos 605
Modification of safety critical systems: an assessment of three approaches
T. Stålhane, K.J. Wedde 611
The Cascade Vulnerability Problem: the detection problem and a simulated annealing approach for its correction
S. Gritzalis, D. Spinellis 621

Keyword index

1024-node network
IEEE 1355, Routing switch, Clos networks, High energy physics, Network topologies 511

3 of 6 code
IEEE 1355, DS-Link, Twisted pair, Fibre-optic, Protocol stack, Bit error rate (BER), Eye diagram 431

Active vision systems
Hardware development, Yorick series, Robot heads, Control 363
Algorithm mapping
Multipurpose architecture, Parallel processing, Fault tolerance 291
Algorithm-based fault tolerance
Fault tolerance, Multiprocessor architectures, Space redundancy, Time redundancy 151
Allocation
Data-path, Synthesis, Register-file 523
Analytical model
Wormhole routing 491
Application portability
Modular avionics, Operating system, Fault management, Hard real-time, Hardware independence 61
Area-I/O
FPGA, Quantitative analysis, Rent's rule 89
Artificial Neural Networks
Microprocessor implementation, Field-oriented control, Induction motors 105
ATM
IEEE 1355, Credit-based flow control, Multi-lane back-pressure, High-speed switching 481
IEEE 1355, RS232, Data–strobe, UART, PLD, Low cost, High speed 421
Autonomous guided vehicle
Genetic algorithms, Microcontrollers, Optimization 403
Autonomous robots
Modular architecture, Sensor integration 349

Back-up
Recoverable distributed shared memory, Fault-tolerant, Competitive update 183
Bit error rate (BER)
IEEE 1355, DS-Link, Twisted pair, Fibre-optic, Protocol stack, Eye diagram, 3 of 6 code 431
Broadcasting
Fault-tolerant routing, Wormhole routing, Deadlock, Livelock, Mesh, Broadcasting 175
Bus emulation
Embedded systems, Standard buses, Controller update 319

Cache
Memory hierarchy, Power consumption, Low power, Trace-driven simulation 279
Cache coherence
Cache only memory architecture, Shared-bus multiprocessor, Snooping 313
Cache only memory architecture
Cache coherence, Shared-bus multiprocessor, Snooping 313
Cascade Vulnerability Problem
Network and open distributed systems security, Risk analysis, Simulated annealing 621
Central buffer
Head-of-line blocking, Wormhole routing, IEEE 1355 455
Channel
Message passing, Connection 533
Clos
Grid, Torus, Hypercube, IEEE 1355, Packet routing switches, Network labelling, Interconnection networks 499
Clos networks
IEEE 1355, Routing switch, High energy physics, Network topologies, 1024-node network 511
Code analysis
Safety critical systems, Fault tree analysis, Failure mode effect analysis 611
Coloured Petri net
Message passing composition, Specification composition, Reusable program component, Reusable specification component, Software reliability 595
Communication
Mobile robots, Genetic programming 393
Competitive update
Recoverable distributed shared memory, Fault-tolerant, Back-up 183
Compiler optimization
Data prefetch, Programmable engine, Software prefetch 121
Component libraries
Modular software, Re-usability 49
Computer-controlled safety-critical system (CCSCS)
Safety-critical system (SCS), Safety, Hazard analysis and prevention, Prescriptive specification, System integrity 587
Configurable computing
High-performance computing, FPGAS, Heat transfer 223
Connection
Message passing, Channel 533
Control
Hardware development, Yorick series, Active vision systems, Robot heads 363
Controller update
Bus emulation, Embedded systems, Standard buses 319
Coupling methods
Data bus technology, Standardization 13
Credit-based flow control
ATM, IEEE 1355, Multi-lane back-pressure, High-speed switching 481

Data bus technology
Coupling methods, Standardization 13
Data prefetch
Programmable engine, Software prefetch, Compiler optimization 121
Data transmission
Signal processors, Multi-frequency, Full-duplex, Railway 99
Data-path
Synthesis, Allocation, Register-file 523
Data–strobe
IEEE 1355, RS232, ATM, UART, PLD, Low cost, High speed 421
Deadlock
Fault-tolerant routing, Wormhole routing, Livelock, Mesh, Broadcasting 175
Deadlock freedom
Interval routing, IEEE 1355, Packet routing switches, Network labelling 441

Defence procurement
International standards, Safety-critical software, Military avionics 41
Digital beam forming
Ultrasonics, Robotics, Signal processing 383
Digital neuron
Pulse-width, Gaussian functions 271
Digital signal processing
Performance evaluation, Real-time signal processing and control 237
Distributed systems
Real time systems, Task scheduling, Fuzzy algorithms, Fuzzy sets 299
Distributed-memory systems
Parallel computations, Processor 197
DS-Link
IEEE 1355, Twisted pair, Fibre-optic, Protocol stack, Bit error rate (BER), Eye diagram, 3 of 6 code 431
Dynamic scheduling
Real-time multiprocessors, Parallelizable tasks, Resource constraints, Resource reclaiming, Fault-tolerance 163
Dynamic software reconfiguration
Hardware fault tolerance, Real-time avionic application 29

Effectors
Modular avionics, Interfacing, Sensors, Smart sensor, Signal concentrator 1
Embedded system
Microcontroller, FPGA, Prototyping, Hardware/software co-design 249
Embedded systems
Bus emulation, Standard buses, Controller update 319
Eye diagram
IEEE 1355, DS-Link, Twisted pair, Fibre-optic, Protocol stack, Bit error rate (BER), 3 of 6 code 431

Failure mode effect analysis
Safety critical systems, Fault tree analysis, Code analysis 611
Fault management
Modular avionics, Operating system, Hard real-time, Application portability, Hardware independence 61
Fault tolerance
Algorithm-based fault tolerance, Multiprocessor architectures, Space redundancy, Time redundancy 151
Multipurpose architecture, Parallel processing, Algorithm mapping 291
Wormhole routing, Meshes 471
Fault-tolerance
Real-time multiprocessors, Dynamic scheduling, Parallelizable tasks, Resource constraints, Resource reclaiming 163
Fault-tolerant
Recoverable distributed shared memory, Competitive update, Back-up 183
Fault-tolerant routing
Wormhole routing, Deadlock, Livelock, Mesh, Broadcasting 175
Fault tree analysis
Safety critical systems, Failure mode effect analysis, Code analysis 611
Fibre-optic
IEEE 1355, DS-Link, Twisted pair, Protocol stack, Bit error rate (BER), Eye diagram, 3 of 6 code 431
Field programmable gate array (FPGA)
Kalman filter, Implementation 257
Field-oriented control
Microprocessor implementation, Artificial Neural Networks, Induction motors 105
FPGA
Area-I/O, Quantitative analysis, Rent's rule 89
Microcontroller, Prototyping, Embedded system, Hardware/software co-design 249
FPGAS
Configurable computing, High-performance computing, Heat transfer 223
Fuzzy algorithms
Distributed systems, Real time systems, Task scheduling, Fuzzy sets 299
Fuzzy logic control
Part feeding, Intelligent control, Machine vision, Robotics 571
Fuzzy sets
Distributed systems, Real time systems, Task scheduling, Fuzzy algorithms 299

Gaussian functions
Pulse-width, Digital neuron 271
Genetic algorithms
Microcontrollers, Optimization, Autonomous guided vehicle 403
Genetic programming
Mobile robots, Communication 393
Grid
Clos, Torus, Hypercube, IEEE 1355, Packet routing switches, Network labelling, Interconnection networks 499

Hard real-time
Modular avionics, Operating system, Application portability, Hardware independence 61
Hardware development
Yorick series, Active vision systems, Robot heads, Control 363
Hardware fault tolerance
Dynamic software reconfiguration, Real-time avionic application 29
Hardware independence
Modular avionics, Operating system, Fault management, Hard real-time, Application portability 61
Hardware/software co-design
Microcontroller, FPGA, Prototyping, Embedded system 249
Hassle
Humans, Leadership, Motivation, People, Software producing units 605
Hazard analysis and prevention
Safety-critical system (SCS), Computer-controlled safety-critical system (CCSCS), Safety, Prescriptive specification, System integrity 587
Head-of-line blocking
Central buffer, Wormhole routing, IEEE 1355 455
Heat transfer
Configurable computing, High-performance computing, FPGAS 223
High energy physics
IEEE 1355, Routing switch, Clos networks, Network topologies, 1024-node network 511
High speed
IEEE 1355, RS232, ATM, Data–strobe, UART, PLD, Low cost 421
High-performance computing
Configurable computing, FPGAS, Heat transfer 223
High-speed switching
ATM, IEEE 1355, Credit-based flow control, Multi-lane back-pressure 481
Humans
Hassle, Leadership, Motivation, People, Software producing units 605
Hypercube
Clos, Grid, Torus, IEEE 1355, Packet routing switches, Network labelling, Interconnection networks 499

IEEE 1355
ATM, Credit-based flow control, Multi-lane back-pressure, High-speed switching 481
Central buffer, Head-of-line blocking, Wormhole routing 455
Clos, Grid, Torus, Hypercube, Packet routing switches, Network labelling, Interconnection networks 499
DS-Link, Twisted pair, Fibre-optic, Protocol stack, Bit error rate (BER), Eye diagram, 3 of 6 code 431

Kalman filter
Field programmable gate array (FPGA), Implementation 257

Leadership
Hassle, Humans, Motivation, People, Software producing units 605

Livelock
Fault-tolerant routing, Wormhole routing, Deadlock, Mesh, Broadcasting 175
Low cost
IEEE 1355, RS232, ATM, Data–strobe, UART, PLD, High speed 421
Low power
Cache, Memory hierarchy, Power consumption, Trace-driven simulation 279

Machine vision
Part feeding, Intelligent control, Fuzzy logic control, Robotics 571
Memory hierarchy
Cache, Power consumption, Low power, Trace-driven simulation 279
Mesh
Fault-tolerant routing, Wormhole routing, Deadlock, Livelock, Broadcasting 175
Meshes
Wormhole routing, Fault tolerance 471
Message passing
Channel, Connection 533
Message passing composition
Specification composition, Reusable program component, Reusable specification component, Software reliability, Coloured Petri net 595
Microcontroller
FPGA, Prototyping, Embedded system, Hardware/software co-design 249
Microcontrollers
Genetic algorithms, Optimization, Autonomous guided vehicle 403
Microprocessor implementation
Field-oriented control, Artificial Neural Networks, Induction motors 105
Military avionics
Defence procurement, International standards, Safety-critical software 41
Mobile robots
Communication, Genetic programming 393
Modular architecture
Autonomous robots, Sensor integration 349
Modular avionics
Interfacing, Sensors, Effectors, Smart sensor, Signal concentrator 1
Operating system, Fault management, Hard real-time, Application portability, Hardware independence 61
Modular software
Component libraries, Re-usability 49
Motivation
Hassle, Humans, Leadership, People, Software producing units 605
Motor control
Transputers, Parallel controller architecutre 113
Multi-frequency
Data transmission, Signal processors, Full-duplex, Railway 99
Multi-lane back-pressure
ATM, IEEE 1355, Credit-based flow control, High-speed switching 481
Multicasting
IEEE 1355, Vision 463
Multiprocessor architectures
Algorithm-based fault tolerance, Fault tolerance, Space redundancy, Time redundancy 151
Multipurpose architecture
Parallel processing, Fault tolerance, Algorithm mapping 291

Navigation
Radar, Sensors 377
Network and open distributed systems security
Cascade Vulnerability Problem, Risk analysis, Simulated annealing 621
Network labelling
Clos, Grid, Torus, Hypercube, IEEE 1355, Packet routing switches, Interconnection networks 499
Interval routing, Deadlock freedom, IEEE 1355, Packet routing switches 441
Network topologies
IEEE 1355, Routing switch, Clos networks, High energy physics, 1024-node network 511
Node controllers
Wireless networks, Remote control 79

Operating system
Modular avionics, Fault management, Hard real-time, Application portability, Hardware independence 61
Optimization
Genetic algorithms, Microcontrollers, Autonomous guided vehicle 403

Packet routing switches
Clos, Grid, Torus, Hypercube, IEEE 1355, Network labelling, Interconnection networks 499
Interval routing, Deadlock freedom, IEEE 1355, Network labelling 441
Parallel computations
Distributed-memory systems, Processor 197
Parallel controller architecture
Transputers, Motor control 113
Parallel processing
Multipurpose architecture, Fault tolerance, Algorithm mapping 291
Parallelisation
System design, Postcode recognition 131
Parallelizable tasks
Real-time multiprocessors, Dynamic scheduling, Resource constraints, Resource reclaiming, Fault-tolerance 163
Part feeding
Intelligent control, Fuzzy logic control, Machine vision, Robotics 571
PCC

Dynamic software reconfiguration, Hardware fault tolerance 29
Real-time multiprocessors
Dynamic scheduling, Parallelizable tasks, Resource constraints, Resource reclaiming, Fault-tolerance 163
Real-time signal processing and control
Digital signal processing, Performance evaluation 237
Recoverable distributed shared memory
Fault-tolerant, Competitive update, Back-up 183
Register-file
Data-path, Synthesis, Allocation 523
Remote control
Wireless networks, Node controllers 79
Rent's rule
Area-I/O, FPGA, Quantitative analysis 89
Resource constraints
Real-time multiprocessors, Dynamic scheduling, Parallelizable tasks, Resource reclaiming, Fault-tolerance 163
Resource reclaiming
Real-time multiprocessors, Dynamic scheduling, Parallelizable tasks, Resource constraints, Fault-tolerance 163

Reusable program component
Message passing composition, Specification composition, Reusable specification component, Software reliability, Coloured Petri net 595
Reusable specification component
Message passing composition, Specification composition, Reusable program component, Software reliability, Coloured Petri net 595
Risk analysis
Cascade Vulnerability Problem, Network and open distributed systems security, Simulated annealing 621
Robot heads
Hardware development, Yorick series, Active vision systems, Control 363
Robotics
Part feeding, Intelligent control, Fuzzy logic control, Maching vision 571
Ultrasonics, Digital beam forming, Signal processing 383
Routing switch
IEEE 1355, Clos networks, High energy physics, Network topologies, 1024-node network 511
RS232
IEEE 1355, ATM, Data–strobe, UART, PLD, Low cost, High speed 421

Safety
Safety-critical system (SCS), Computer-controlled safety-critical system (CCSCS), Hazard analysis and prevention, Prescriptive specification, System integrity 587
Safety critical systems
Fault tree analysis, Failure mode effect analysis, Code analysis 611
Safety-critical software
Defence procurement, International standards, Military avionics 41
Safety-critical system (SCS)
Computer-controlled safety-critical system (CCSCS), Safety, Hazard analysis and prevention, Prescriptive specification, System integrity 587
SAN
ServerNet, Topologies, Wormhole routing 545
Sensor integration
Modular architecture, Autonomous robots 349
Sensors
Modular avionics, Interfacing, Sensors, Effectors, Smart sensor, Signal concentrator 1
Radar, Navigation 377
ServerNet
Topologies, Wormhole routing, SAN 545
Shared-bus multiprocessor
Cache coherence, Cache only memory architecture, Snooping 313
Signal concentrator
Modular avionics, Interfacing, Sensors, Effectors, Smart sensor 1
Signal processing
Suboptimal signal detection, Programmable logic VLSI 73
Ultrasonics, Robotics, Digital beam forming 383
Signal processors
Data transmission, Multi-frequency, Full-duplex, Railway 99
Simulated annealing
Cascade Vulnerability Problem, Network and open distributed systems security, Risk analysis 621
Smart sensor
Modular avionics, Interfacing, Sensors, Effectors, Signal concentrator 1
Snooping
Cache coherence, Cache only memory architecture, Shared-bus multiprocessor 313
Software prefetch
Data prefetch, Programmable engine, Compiler optimization 121
Software producing units
Hassle, Humans, Leadership, Motivation, People 605
Software reliability
Message passing composition, Specification composition, Reusable program component, Reusable specification component, Coloured Petri net 595
Space redundancy
Algorithm-based fault tolerance, Fault tolerance, Multiprocessor architectures, Time redundancy 151
Specification composition
Message passing composition, Reusable program component, Reusable specification component, Software reliability, Coloured Petri net 595
Standard buses
Bus emulation, Embedded systems, Controller update 319
Standardization
Data bus technology, Coupling methods 13
Suboptimal signal detection
Signal processing, Programmable logic VLSI 73
Synthesis
Data-path, Allocation, Register-file 523
System design
Parallelisation, Postcode recognition 131
System integrity
Safety-critical system (SCS), Computer-controlled safety-critical system (CCSCS), Safety, Hazard analysis and prevention, Prescriptive specification 587

Task scheduling
Distributed systems, Real time systems, Fuzzy algorithms, Fuzzy sets 299
Telephone adapter
Internet, Telephony system 213
Telephony system
Internet, Telephone adapter 213
Time redundancy
Algorithm-based fault tolerance, Fault tolerance, Multiprocessor architectures, Space redundancy 151
Topologies
ServerNet, Wormhole routing, SAN 545
Torus
Clos, Grid, Hypercube, IEEE 1355, Packet routing switches, Network labelling, Interconnection networks 499
Trace-driven simulation
Cache, Memory hierarchy, Power consumption, Low power 279
Transputers
Parallel controller architecture, Motor control 113
Twisted pair
IEEE 1355, DS-Link, Fibre-optic, Protocol stack, Bit error rate (BER), Eye diagram, 3 of 6 code 431

UART
IEEE 1355, RS232, ATM, Data–strobe, PLD, Low cost, High speed 421
Ultrasonics
Robotics, Digital beam forming, Signal processing 383

Vision
IEEE 1355, Multicasting 463
VMEbus
Programmable logic controller, PLC processor module 329

Wireless networks
Node controllers, Remote control 79
Wormhole routing
Analytical model 491
Central buffer, Head-of-line blocking, IEEE 1355 455
Fault tolerance, Meshes 471
Fault-tolerant routing, Deadlock, ServerNet, Topologies, SAN 545
Livelock, Mesh, Broadcasting 175

Yorick series
Hardware development, Active vision systems, Robot heads, Control 363
